

UTILITIES TECH

Enabling Excellence

Company Profile

"The realm of utilities is undergoing a technological revolution, reshaping the way services are delivered."

About OUR COMPANY

At Utilities Tech, we are driven by the goal of providing comprehensive technology solutions within the Utilities sector and beyond, both on a macro and micro scale. Leveraging our proven expertise in data migration and analytics, we are dedicated to expanding our capabilities in asset and work management, human capital management (HCM), and overall ERP solutions. Additionally, we aim to design cost-effective and efficient solutions tailored for SMEs in both the business and household sectors. These solutions aim to streamline operations, enhance transparency with a short learning curve, and reduce maintenance expenditures.

Utilities have transformed significantly from their traditional models, adapting to changes in regulations, demand fluctuations, price volatility, evolving consumer needs, and heightened competition. In this shifting landscape, the industry faces a dual challenge: a decline in revenue and an increase in consumer tech awareness. There is also a growing need to prioritize environmental sustainability, driven by a conscientious populace.

Beyond our technical objectives, we strongly believe in the collective impact of individuals, professional teams, and emerging IT solution providers in our interconnected world. As we navigate this rapidly changing environment, we emphasize the importance of building a team that is environmentally aware and understands the significance of individual and collective roles in making a positive difference. We are confident that by instilling these values, we can contribute meaningful value to all our endeavors.

Our VISION

“To become a leading solution provider and the most credible technology partner.”

Our MISSION

We aim to provide innovative and smart solutions to meet the technology needs of utilities sector. We are committed to build credible resources that carefully understand and value customer's perspective and deliver results with responsibility and efficiency.

Our VALUES

Our values, derived from our beliefs, are our fundamental driving forces that set our priorities. Our values are the key pillars to support an ethical and progressive culture promoting equality, respect, responsibility, collaboration, efficiency and innovation.

RESPONSIBILITY

We maintain highest level of personal and professional integrity. We act with responsibility and ensure transparency in our operation and in our business relations. We protect our assets and ensure confidentiality in all aspects of our business activities. We are committed to a safe and healthy work environment to ensure everyone is safe at the workplace.

RESPECT

We encourage and promote a culture of mutual respect. We strive to provide an environment where everyone is treated respectfully regardless of anything. Being open with each other and having a clear communication is the minimum we expect. We do not tolerate discrimination, harassment or violence of any kind.

COLLABORATION

We believe in strong collaboration that enables team synergies. We want to build relationships based on trust with our partners and our clients, achieving mutual excellence. We believe in the power of working together. Being collaborative and supporting each other will provide us the constant energy to follow our vision.

PROGRESSIVE

We aim to nurture a thrust of continuous improvement in our people. Our goal is to have a strong progressive workplace that enables individuals to develop personally and professionally. Learning from our experiences, supporting innovation and building a problem-solving mindset will be followed by efficiency and excellence.

“Effective IT Service Management is crucial for ensuring seamless operations, minimizing downtime, and enhancing overall organizational efficiency in the rapidly evolving digital landscape.”

Our
SERVICES

- Data Migration
- Data Analytics
- Customer Engagement Solution
- Project Management

“Data migration plays a pivotal role in ensuring the seamless transition, accuracy, and integrity of information, thereby enabling organizations to harness the full potential of their data-driven initiatives.”

Our SERVICES

Data Migration

Data migration involves the seamless transfer of data from one location, format, or system to another, a widely adopted practice across IT, business, and data management domains. The need for data migration arises in various scenarios, such as transitioning to updated software or hardware, consolidating data from diverse sources, or migrating data to a cloud-based system.

Our seasoned professionals, boasting over a decade of robust experience in the Energy & Utilities Industry, have demonstrated their expertise on a global scale. Having navigated the challenges posed by evolving technology barriers and shifting consumer needs, they have successfully empowered clients worldwide. With a profound industry footprint spanning the Americas, Middle East, India, and Pakistan, our consultants deliver comprehensive services, offering solutions tailored to meet a diverse array of challenges.

We've collaborated with clients boasting millions of customers and managed transactions in the billions, partnering with renowned utilities providers in the Middle East and Pakistan. Our impeccable track record includes a 100% data reconciliation rate, and our expertise extends to seamless migration in cloud-based environments.

A blue-tinted photograph of a business meeting. In the center, a tablet displays a bar chart with a green arrow pointing upwards. Several hands are visible, some pointing at the screen and others holding pens. In the background, there are various business documents, including a circular chart and a bar chart. The overall scene conveys a professional and data-driven environment.

“Unlocking the beauty of data analytics—where insights shine, decisions become clear, and management is empowered to navigate with precision.”

Our SERVICES

Data Analytics

Oracle Analytics

Oracle Analytics is a technology-driven approach to data analysis, providing actionable insights for informed decision-making among executives, managers, and employees. In the Business Intelligence (BI) process, organizations gather data from internal IT systems and external sources, ready it for analysis, run queries, and generate data visualizations, BI dashboards, and reports. This empowers business users for operational decision-making and strategic planning.

Oracle Analytics encompasses the entire data and analytics process, offering built-in capabilities for data ingestion, modeling, preparation, enrichment, visualization, and collaboration—all while maintaining robust security and governance.

BI Publisher

BI Publisher empowers users to design and generate report layout templates using popular desktop applications like Microsoft Word and Adobe Acrobat. Leveraging XML data, it produces reports in various formats such as PDF, RTF, Excel, HTML, and more, supporting multiple languages—all from a single template.

“Reporting acts as a beacon, illuminating data visibility and aligning the workforce, ensuring everyone is on the same page in the journey toward organizational success.”

Our SERVICES

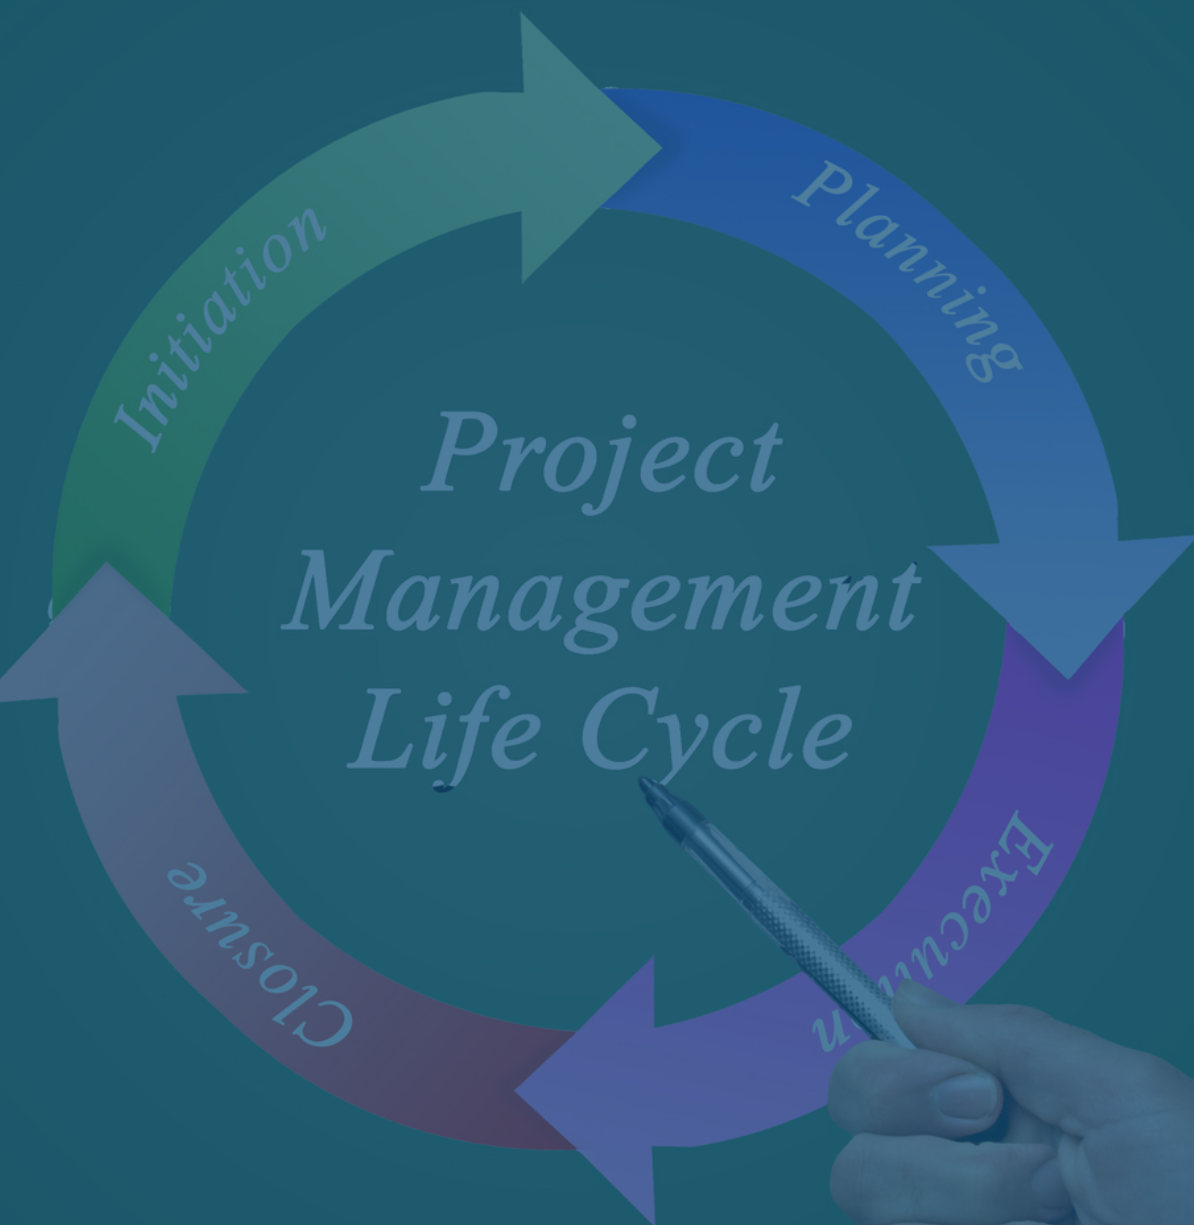

Customer Engagement Solution

Precisely EngageOne™ Solutions

An innovative suite designed to empower enterprises with superior decision-making capabilities. Craft seamless, personalized, and omnichannel communications effortlessly across various mediums and at any time. Customers seek easy access to pertinent information, and our solutions cater to this need by delivering accurate and up-to-date details on coverages, contracts, claims, and billing history. Whether you aim to streamline electronic communications, expedite payment processes, or enhance customer experience while reducing service costs, our solutions provide comprehensive coverage.

Precisely EngageOne™ offers a spectrum of tools and functionalities:

- EngageOne Compose (Digital self-service)
- Digital archiving solutions
- SMS and email solutions
- EngageOne Designer
- Interactive personalized video solutions
- Print-to-digital solutions
- Business Archestraton
- Data enrichment solution

“As the master key to success, Project Management plays a pivotal role in implementing IT projects seamlessly within the designated time, budget, and desired scope.”

Our SERVICES

Project Management

Effective project management is pivotal for the success of any project, especially in the Utilities and Energy sectors where large-scale projects often adopt the waterfall methodology. This approach is rooted in the fundamental processes and knowledge base outlined by the Project Management Institute (PMI).

Our certified project management team, boasting over two decades of experience in handling substantial projects in the Middle East and Pakistan, is committed to working closely with clients. We prioritize a comprehensive understanding of project objectives, fostering transparent and collaborative communication to ensure timely deliverables that align with client expectations and prevent scope creep.

Upholding principles of transparency and collaboration, we aim to build enduring relationships and deliver exceptional project management services tailored to your unique requirements. Our dedication to client success extends beyond the technicalities of project management. We believe in forging partnerships that go the extra mile, ensuring not just project completion but sustainable growth and client satisfaction. Your success is our commitment, and we are ready to navigate the complexities of your project, unlocking the potential for excellence and innovation.

“Selecting the right IT product is pivotal, as it lays the foundation for streamlined operations, enhanced efficiency, and future-proofing your business in the ever-evolving technological landscape.”

Our PRODUCT EXPERTISE

Oracle Utilities

Oracle Utilities Customer to Meter (C2M) is a comprehensive solution designed to revolutionize the utilities industry's end-to-end processes, seamlessly integrating vital components such as Customer Care and Billing (CCB), Meter Data Management (MDM), Mobile Workforce Management (MWM), and Work and Asset Management (WAM).

At its core, C2M provides utilities companies with a unified platform for managing customer interactions, billing, meter data, and workforce operations. CCB ensures efficient customer service, accurate billing, and revenue management, fostering a positive experience for both utility providers and consumers. Simultaneously, MDM collects, manages, and analyzes meter data to support precise billing and operational efficiency. The addition of MWM optimizes field operations, enabling efficient management of mobile workforces. WAM complements the suite by offering robust asset and work management capabilities.

Together, these interconnected components empower utilities companies to streamline operations, enhance customer satisfaction, and adapt to the dynamic utilities landscape. With Oracle Utilities C2M, organizations can achieve a holistic and innovative approach to managing their customer, meter, and asset-related processes.

“Client satisfaction and exceptional customer service are paramount to establishing credibility and cultivating enduring professional relationships.”

Our SUCCESS STORIES

The value of a relationship is the determining factor in choosing to engage with a service provider for the establishment of a long-lasting and meaningful business partnership.
